Updated Pension Statements

With the 2024 year now behind us, the Teachers' Pension Plan "service and salary" statements will be updated to include the 2024 calendar year. This is based on information provided by districts to the TPP.

Members are encouraged to check their individual information for accuracy. It is available by logging on to the "My account" section on the [TPP website](#), and it should be updated later this month.

Any discrepancies should be reported to the district for follow up with the TPP office. They can also be reported directly to the TPP, and they will be able to check the information that was provided to them by the district.
